As we Hereford seedstock producers work to improve our position as an integral part of the beef industry, we have many traits that must fall in line to get our product from pasture to plate and keep our cow herd moving forward.

- S342 comes close to treeing all coons (traits) up one tree as the old saying goes.
- S342 has gone through the National Reference Sire Program.
- S342 sons are thick butted, travel with ease, as he does and are seedstock and commercial producer accepted.
- S342 daughters are making great brood cows with excellent udder structure and milk flow.
- S342 is homozygous polled, may sire some extra white.
- Offering  $\frac{1}{3}$  interest and  $\frac{1}{2}$  possession in the Beefmaker Bull Sale — Feb. 17, 2012.
